

RISHABH JAIN

CEO, Sensoprox · Senior, Babson College · Entrepreneurship · 3.75 GPA

Kashipur, India · Boston, MA · jain.rishabh0017@gmail.com · +91 93898 83367 · [linkedin.com/in/rishabh-jain17](https://www.linkedin.com/in/rishabh-jain17)

I enjoy the work of growing businesses where strategy meets execution. Over the past few years I've deliberately pursued experiences across consulting, manufacturing, technology, and consumer brands, because I believe strong operators understand businesses from multiple angles. Today, I lead Sensoprox, a premium oral care brand, driving product development, ecommerce growth, marketing, and expansion strategy — while preparing to join the wider family business full time after graduation.

CURRENTLY LEADING

Sensoprox Chief Executive Officer

Sensoprox is a premium oral care brand — manual and electric toothbrushes, water flossers, and toothpaste. I lead its next phase of growth: ecommerce across Amazon and direct-to-consumer, performance marketing and our social media team, website redesign, product development and launches, packaging, international supplier negotiations, and our U.S. market entry strategy.

What excites me most is scaling something real. Turning it into a premium consumer brand means solving a different problem every day — supplier negotiations in the morning, launch and marketing strategy in the afternoon.

EXPERIENCES THAT CHANGED HOW I THINK

Apex Filaments Manufacturing & Exports

Worked across production, exports, quality control, and procurement inside one of India's leading monofilament manufacturers, supplying customers in 40+ countries.

CaseBasix Business Consulting

Developed consulting frameworks and structured business solutions used by more than 250 trainees globally, sharpening how I approach ambiguous problems.

Grant Thornton Bharat Technology Research

Supported technology consulting research focused on digital transformation, industry analysis, and strategic insight.

OUTSIDE WORK

I've travelled to 25+ countries and enjoy experiences that push me beyond my comfort zone—from flyboarding and skydiving to exploring new cultures around the world. Outside work, I spend much of my time reading about startups, AI, consumer brands, and the founders building them. I'm fascinated by how great businesses are created and scaled, and I believe the best leaders never stop learning, asking questions, and seeking new perspectives. That curiosity shapes how I approach both business and life.

WHAT I'M LOOKING FORWARD TO

I'm looking forward to drafting and leading a team of people who enjoy solving difficult problems and turning ideas into execution. My job as CEO is to set clear direction, create real accountability, and build a culture where trust and creativity produce exceptional results — and to make sure everyone walks away better for having been part of it.

HOW I WORK

Ownership over titles

Execution before perfection

Comfortable with ambiguity

High accountability

Structured problem solving

Technology-first mindset

Long-term thinker
